

Septum Piercing Aftercare

Morning: Wash hands. Saturate both ends of a qtip with saline solution and apply to both sides of the piercing with opposite ends of the qtip. Allow to soak for 3-5 minutes, reapplying if necessary. Place a little drop of soap in the palm of your hand. Wet both ends of the qtip and lather up soap and water on both ends of the qtip. Lather up both sides of the piercing using opposite ends of the qtip. Wet a new qtip with water and rinse off both sides of the piercing, then dry qtip both sides of the piercing with another qtip.

Afternoon: Wash hands. Saturate both ends of a qtip with saline solution. Apply to both sides of the piercing using opposite ends of the qtip. Allow to soak for 3-5 minutes, reapplying if necessary. Wet a new qtip with water and rinse off both sides of the piercing, then dry qtip both sides of the piercing with

another qtip.

Evening: Wash hands. Saturate both ends of a qtip with saline solution and apply to both sides of the piercing with opposites ends of the qtip. Allow to soak for 3-5 minutes, reapplying if necessary. Wet both ends of a qtip with water and rinse off both sides of the piercing, then use a dry qtip to dry both sides of the piercing.

You want to keep up the Aftercare for 6 - 8 weeks, 8 weeks is preferable.

No jewelry changes before 6 - 8 weeks, again 8 weeks is preferable.

If you have any questions, concerns, or troubles along the way, please be sure and let me know.
